

CAITLIN KEENUM

ARCHITECTURAL DESIGNER

With over a decade of experience as an architectural designer, I've enjoyed contributing creatively and technically to bring ambitious designs to life. I excel in collaborative, growth-oriented environments, focusing on creating designs that address real-world challenges. I am currently in the process of attaining licensure and remain committed to furthering my skills and expertise to deliver functional design solutions.

EXPERIENCE

PROGRAM MANAGER – Cityscape Architects
2023 - Present

Provide program-based architectural expertise for Stellantis, supporting renovations, retrofits, and new construction projects for Chrysler, Dodge, Jeep, Ram, Alfa Romeo, and Fiat dealerships across the U.S. and Canada. Collaborate with clients to define programming requirements and evaluate design proposals. Lead a dedicated team to produce precise conceptual documents while overseeing technical architecture and ensuring seamless design execution.

ARCHITECTURAL DESIGNER – Gilbert McLaughlin Casella
2022 - 2023

Developed projects from initial programming through construction documentation, encompassing a diverse portfolio including mixed-use developments, university and educational facilities, religious institutions, and athletic centers. Prepared design documents across all project phases.

LEAD DESIGNER – Broadway Building Group
2021-2022

Designed and drafted single-family speculative homes in the greater Nashville area, managing schematic design through construction documentation while ensuring compliance with local residential codes. Coordinated interior elements such as electrical, plumbing, fixtures, and casework. Supported construction management by resolving on-site issues and assisted with sourcing and procuring building materials.

ARCHITECTURAL DESIGNER – Creative Design Solutions
2017-2021

Worked with architects to complete renovation and new construction projects in the areas of commercial, health care, and multifamily design. Utilized BIM software to create comprehensive construction documents, three-dimensional models, and renderings. Developed solutions that ensure safety by meeting code requirements. Selected finishes and specified installation techniques and quality standards. Collaborated with consultants to coordinate and convey overall design intent. Performed all construction administration duties including shop drawing review, RFI's, proposal requests, submittal review, and project punches.
